

Bozeman Municipal Watershed Project Activity & Closure Notice

Please watch for the following in this area:

Fuel reduction work using prescribed burning, thinning, and timber harvest.

Equipment (including logging trucks, helicopters, and other machinery) and crews working.

Smoke from prescribed burns may be visible at times.

Temporary closures of roads or trails.

The **Bozeman Municipal Watershed Project** is a cooperative effort, established in 2011, between the Custer Gallatin National Forest and the City of Bozeman to provide fuel reduction work in this area to maintain a high-quality, predictable water supply for Bozeman residents.

This project will:

- Reduce the risk of severe and extensive wildfire in the lower portions of Hyalite and Bozeman Creeks.
- Limit the amount of sediment and ash entering the water treatment facilities in the event of a fire.
- Increase public and firefighter safety while reducing risk of wildfire spread which will protect private lands that border the watershed.

For more information about activity and potential closures, please visit www.bznwatershed.com.
